Andrew C. Wang
Publisher:
Andrew C. Wang
Release Date: 21 Feb, 2019

Minimum:

Requires a 64-bit processor and operating system

OS: Windows 10, 64-bit

Processor: Intel™ Core™ i5-4590 o

English

a lullaby of colors vr

Awesome game! Really relaxing.. Interesting concept. You are basically hovering over a lot of different coloured nodules that move randomly up or down. If you don't like how they move you can go to the next universe. Nodules sometime move as a wave, or in groups or by them selves. The colours are rainbow coloured. The whole thing is a simplistic style. Kinda pleasing, hey I spent 15 minutes in there before getting bored. The music changes for each universe. Most of the music is uninspiring. I have read some of the other comments and agree some more variety of objects, and maybe the nodules moving to the music

would be fun.. Needs the following: Smooth turning option Option to sync to external audio More variety than just the current randomly generated environments - suggestions have a green hill environment with blue sky, pink clouds, purple river etc At the moment it gets boring and very same-ish after 30 seconds Even just a bit more depth and I would happily recommend but at the moment every experience is far too similar to get more than 5-10 mins enjoyment out of it. Wonderful little VR experience . Bright vibrant moving colours together with 'musical chime' tones really add a relaxing feeling to the whole thing. Definitely worth the purchase price, especially if you like things with a quirky edge.. Wonderful little VR experience .
