3/10! Open game then close game = all achievements.. This game is no quiz, its an random clicking game. Questions are in no relation to the answer-possibilities. Developer should use an search engine, to obtain the knowlegde, he is requesting( and accept the correct answers). Positive point in this is, starting the game is enough getting the achivement to perfect game. This games are only for achivements usefull, there is no quality, no more value. got 6 games for 1.20, thats the maximum worth of it. It is easy 5k achievements but the game is not worth it. If you are going to buy this, buy it for the achievements NOT THE GAMEPLAY.. Dont waste your money on this game unless you bought the Steam Winter sale right now for \$2.73, besides that this isnt worth the price. The 5k acheivements isnt bad but the gameplay is boring, I bought this and the other 48 games for \$2.73 and for that price not to bad but I would never spend more than 10 cents on this game.. Hahaha this game is so hard! Or maybe I am just stupid :( This is a well made game with questions (for me at least) that arnt stupidly easy. If you enjoy trivia games, puzzles or question based gameshows this is 100% for you!! good game guys 8/10 p.s please allow us to lower the volume in a settings menu :). 10/10 didn't know i was so stupid before i played this. 3/10! Open game then close game = all achievements.
